

Talk on Admissions to HKU Space

In order to provide S.6 students with more information about self-finance tertiary education programmes , the Career Team invited Mr. Andrew C.Y. Mui, College Lecturer of HKU Space, to give a talk on the admissions of the institution on 8 January 2016.

In the talk, Mr. Mui introduced the admission information, learning environment and curriculum of HKU Space. He also gave our students some hints on how to further their studies after the completion of sub-degree programmes. Through the talk, S.6 students are able to know more about information about other pathways for their studies. All students have benefitted a lot from the talk.
