

Learning Cultures through English

To enable our students to explore different cultures through English, our English Club invited a German gap year student from AIESEC to come and share with our S3 and S4 students on 11 April and 21 April 2017.

Through the interactive sharing, our students had a taste of the German language, explored German culture and most importantly, developed their confidence in communicating with a foreigner in English. They also learnt how to make a Schultüte, which is given to kids in Germany on their first day of school, and is filled with all sorts of treats and yummy sweets. Our students were very interested in the sharing sessions and learnt English in a fun and interactive environment.
