

## The Junior Research Mentoring Programme 2022

(22 September 2022)

5E **KUNG Ka-ho** and 5E **WONG Beatrix Agatha** participated in the “Junior Research Mentoring Programme 2022” organized by the Hong Kong Polytechnic University. The programme aims to deepen students’ understanding of a chosen research topic, and help them make informed university programme and career choices.

Under the instruction and guidance of professors and their research teams, Ka-ho conducted research on the topic of “Application of Blockchain in Non-Fungible Token (NFT)”, while Beatrix worked on “Using Scolioscan Air in Scoliosis Assessment”. They have gained valuable experience throughout the research process, including collecting experimental data and learning basic research techniques.
