

Tokyo STEAM Delegation (8 July 2023 -13 July 2023)

30 students participated in **Tokyo STEAM Delegation** organized by our school from 8 July 2023 (Saturday) to 13 July 2023 (Thursday) They visited museums (Mitsubishi Minatomirai Industrial Museum, Miraikan - The National Museum of Emerging Science and Innovation and teamLab Planets TOKYO), structures (Morigasaki Water Reclamation Center, Tokyo Metropolitan Government Environment Bureau - Central Breakwater Office Complex) and workshops (ANA Blue Hangar) in Tokyo, Japan.

The delegation aims to enhance students' learning in STEAM education, enable students to widen their horizons through scientific knowledge, advanced technology, innovative construction and diverse multimedia designs, contributing to the sustainable development of our city in the future.

Principal YUEN sees students off at the airport, wishing them an enjoyable learning experience

Students acquire knowledge and technology relating to combating hazards

Students explore robotic applications

Students learn how to tackle environment issues through science and technology

Students are watching exhibits combining science, technology and art designs at Panasonic Center Tokyo

Students are experiencing the newest products designed by Chiba Institute of Technology

Students are attracted by the advanced Aerospace technology in the Mitsubishi Minatomirai Industrial Museum

In the Honjo Life Safety Learning Center, high-fidelity simulators strengthen students' ability and awareness of dealing with natural disasters

In the Tokyo Metropolitan Government Waste Landfill Site, students have a better understanding of how to alleviate pollution through technology
