

High-flyers Sharing Session cum Secondary One Admission Information Talk

(10 December 2022)

Three consecutive sessions of High-flyers Sharing Session cum Secondary One Admission Information Talk were successfully held in a row on Saturday, 10 December 2022 in the School Hall. 423 participants including 209 Primary Six students and their parents together with some of their principals, assistant principals and teachers from 45 primary schools in our neighbourhood delightedly attended the event.

Principal YUEN marked the beginning of the activity by giving a welcoming speech, in which he introduced our school to the participants. His speech was nicely concluded by a video having our high flyers to share their joyful school life and myriads of precious learning opportunities with the audience. Right after that, a team of our students gave a lively and amusing sharing on their fruitful learning experiences, colourful school life and outstanding achievements of their fellow schoolmates. The sharing was followed by a video in which our graduates, who are also alumni of different primary schools, sent words of encouragement to motivate the young pupils to work hard and learn well, wishing them every success in reaching their ideal secondary schools. Another sharing session about Secondary One Admission Interview greatly excited all P6 students and their parents. Our students shared useful tips on answering questions when attending interviews and prepared a few questions for the P6 students to try. In the Introductory Session on Allocation of Discretionary Places, our Assistant Principal, Mr TO talked about all details regarding Secondary One admission, giving the audience very useful information. There was also a Question & Answer Session chaired by Principal YUEN and our Assistant Principals, helping the audience be well informed of the criteria for admission and interviews. Last but not least, in the school tour led by our student tour escorts and Parent-Teacher Association helpers, participants were arranged into groups to visit various interesting spots on campus. Through the tour, they could observe Physics and Science experiments, STEM robotics demonstration and hydroponics system, appreciate a variety of brilliant artwork and award-winning projects of Technology for Life and enjoy the great performance of the Chinese Orchestra, the Skipping Team and the Table Tennis Team. It was truly entertaining and gave the participants a taste of Heung Chung's school life.

All participants were invited to give us feedback on the event via an online survey. It is encouraging to find that nearly 99% of the respondents stated they had a better understanding of our school through the sharing session and agreed that this event helped them have deeper understanding of our school's Secondary One admission process.

Highlights of the event are shown in the photos below:

Principal YUEN gives a welcoming speech to mark the beginning of the High-flyers Sharing Session cum Secondary One Admission Information Talk

Students give a presentation on their learning experience
