

## **2024/25 Seasonal Influenza Vaccination School Outreach Programme**

(10 October 2024)

The annual Seasonal Influenza Vaccination School Outreach Programme was successfully held on 10 October 2024 (Thursday). We invited Dr. HUNG Chi-wan Emily, and her team from Cambridge Paediatrics Outreach to provide the vaccination service. A total of 570 students and 25 staff members received the seasonal influenza vaccine.

Receiving the seasonal influenza vaccine is regarded as one of the most effective methods to prevent seasonal influenza and its complications. It enhances students' immune defenses, decreases absenteeism due to illness, and significantly supports their health and learning.
