

Innovative Science Forum – Science Education Talk

(19 November 2024)

The 2024 Science and Technology Innovation Lecture organized by the Hong Kong STEM Education Alliance was successfully held at our school hall on 19 November 2024 (Tuesday).

The topic of the lecture was ‘Photosynthesis that Changed the Earth’, which aims at deepening our students’ interests in nature and science. At the event, we were honoured to have invited Professor WANG Baichen to give a wonderful lecture at our school. He is a Level 2 researcher at the Institute of Botany at the Chinese Academy of Sciences, and he holds the title of professor and PhD supervisor at this Academy.

Principal YUEN presents a commemorative banner to Professor WANG

All participants stand up and sing the national anthem

The MCs introduce Professor WANG to our students

Professor WANG patiently shares with students

Starting with the Great Oxygenation Event 2.4 billion years ago, Professor WANG explains how humans discovered photosynthesis and outlines some major breakthroughs.

Our students are keen to ask questions and interact with Professor WANG

Professor WANG listens and gives detailed explanation to our students' questions
