

Visit to The Nethersole School of Nursing, The Chinese University of Hong Kong

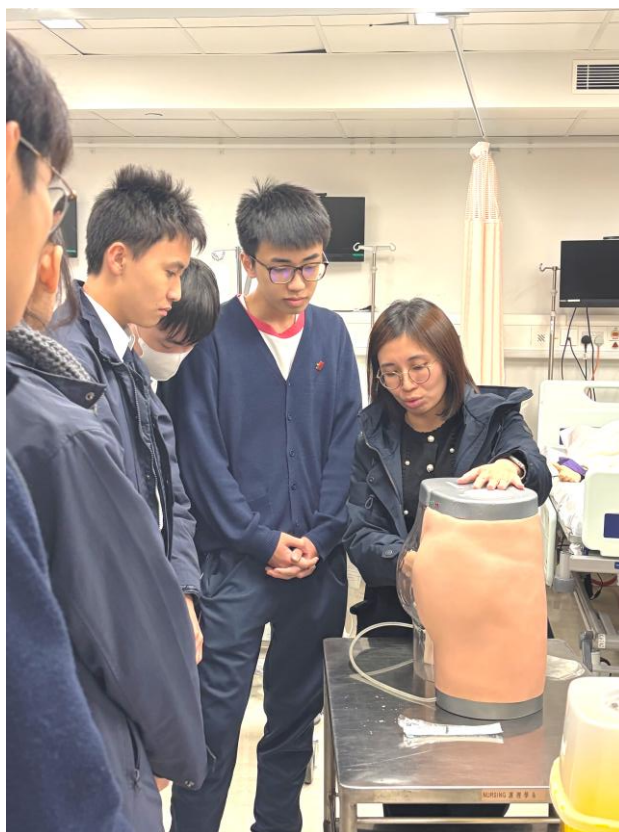

(20 November 2025)

On 20 November 2025 (Thursday), our school's Other Learning Experiences (OLE) Team, Career and Life Planning Team, and Biology Department collaborated to host a successful interdisciplinary activity – a visit to The Nethersole School of Nursing, Faculty of Medicine, The Chinese University of Hong Kong (CUHK).

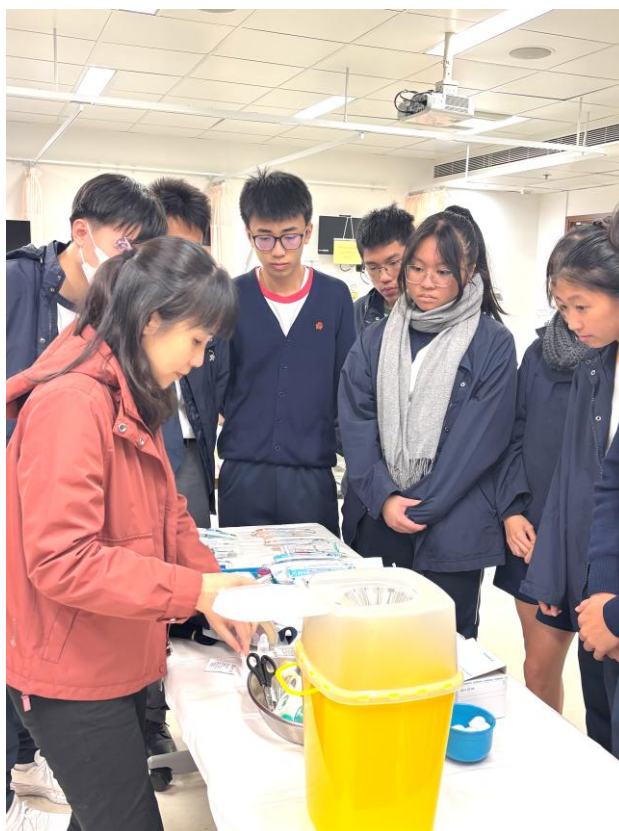

The Nethersole School of Nursing kindly made special arrangements to open its laboratories, allowing students to gain first-hand experience with the daily work of nurses, including clinical skills training and basic professional operations, thereby gaining a deeper understanding of the professional spirit and working environment of healthcare workers. Students were fully engaged, actively participating in all hands-on activities, which served as a crucial opportunity for them to reflect on their own career planning, ultimately enhancing their knowledge of the medical profession and laying a solid foundation for their future academic and career development.

Our students attentively listen to the speaker at the Admission Talk about the Nursing programme

Dr. PANG Cho-kwan, Rebecca, Professional Consultant demonstrates the use of specialized clinical equipment

Professor CHAN Ngo-sheung, Dorothy, Associate Professor demonstrates the use of syringes

Dr. PANG explains various clinical procedures

Our students getting hands-on experience with clinical syringes

Dr. PANG explains various clinical procedures
